

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

### 1. Name of the substance or mixture and the company

#### 1.1. Product identifier

Substance Name / Trade Name ThermoActive

#### 1.2. Relevant identification Use of the substance or mixture and uses that are discouraged

Relevant Identified Use: Roof coating

Recommended Restriction of use: ThermoActive is a durable protective coating for almost all outdoor surfaces. The roof pitch must not be less than 3%. Due to the special composition of ThermoActive, there are a number of energetic applications in summer and winter thermal insulation.

#### Details of the supplier providing the safety data sheet

##### Manufacturer / Supplier

Company: SICC Coatings GmbH, Wackenbergstraße 78-82, D-13156 Berlin

Phone: +49(0) 30 / 500 196-0

Fax: +49(0) 30 / 500 196-20

Email address: [info@sicc.de](mailto:info@sicc.de)

Responsible/issuing person: Application Technology / Research and Development

#### 1.3. Emergency number

Outside Business Hours 112, (Mon.-Fri. 08:00 - 16:30)

### 2. Possible dangers

#### 2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008. No hazardous substance or mixture. Supplementary labelling elements/information on certain mixtures, EUH208

Supplementary labelling elements/information on certain mixtures, EUH210

#### 2.2. Marking elements

Marking elements in accordance with Regulation (EC) No. 1272/2008.

No hazardous substance or mixture.

**Signal word:** No signal word

**Hazard warnings:** No hazard warnings required

##### Safety note:

P101: If medical advice is required, have packaging or label ready

P102: Keep out of reach of children.

P103: Read the label before use.

##### Other marking elements:

EUH208: Contains 1,2-benzisothiazole-3(2H)-one. May cause allergic reactions.

EUH210: Safety Data Sheet available on request.

#### 2.3. Other hazards

Based on the available information, the product does not contain any PBT or vPvB substances in content percentages greater than 0.1%.

### 3. Composition / information on the ingredients

#### 3.1. Substances

not applicable

#### 3.2. Mixtures

1,2-benzisothiazole-3(2H)-one (0.048%)

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

CAS Number: 2634-33-5  
Acute Oral Toxicity, Category 4, H302  
Etching/irritating effect on the skin, category 2, H315  
Severe eye damage/irritation, Category 1, H318  
Skin Sensitization, Category 1, H317  
Hazardous to water: Acute, Category 1, H400

Zinc oxide (0.1%)  
CAS Number: 1314-13-2  
Aquatic Chronic 1 (Hazardous to Water: Chronic, Category 1, H410)

### 4. First aid measures

#### 4.1. Description of the first aid measure

|                     |                                                                                                                             |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------|
| General information | No special first aid measures required. Bring those affected out of the danger area. First responder must protect himself.  |
| After inhalation    | in case of complaints - fresh air supply                                                                                    |
| After skin contact  | Cleanse skin with soap and water                                                                                            |
| After eye contact   | If necessary, remove contact lenses, keep eyelids open and rinse with plenty of water, seek medical advice                  |
| After swallowing    | can cause nausea, vomiting and diarrhea, also gastrointestinal irritation; Consult a doctor and name the substance exactly. |

#### 4.2. Main acute and delayed symptoms and effects

|           |                          |
|-----------|--------------------------|
| Symptoms: | no information available |
| Risks:    | no information available |

#### 4.3. Indications of immediate medical assistance or special treatment

|            |                          |
|------------|--------------------------|
| Treatment: | no information available |
|------------|--------------------------|

### 5. Firefighting measures

#### 5.1. Extinguishing agent

|                                |                                                        |
|--------------------------------|--------------------------------------------------------|
| Suitable:                      | Foam, carbon dioxide, dry chemicals, spray mist, water |
| Unsuitable for safety reasons: | Observe local conditions.                              |

#### 5.2. Special hazards posed by the mixture

Sealed containers can burst in extreme heat (pressure build-up), smoke, carbon dioxide

#### 5.3. Instructions for firefighting

Cool surrounding containers at risk of fire with water from a safe distance. Material is non-flammable as long as moisture is contained.

### 6. Measures in the event of accidental release

**Personal precautions, protective equipment and procedures to be used in emergencies**

**Protective regulations / see chapters 2 to 5**

#### 6.1. Environmental protection measures

**Observe local, official regulations; Do not let it get into the sewer system.**

#### 6.2. Methods and material for retention and purification

Confine leaked material with non-flammable absorbents (e.g. sand, sawdust, etc.) and dispose of it according to local regulations. Clean with water and detergents, preferably do not use solvents.

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

**6.3. Reference to other sections** For more information, see sections 7, 8 and 13 of the Safety Data Sheet

### 7. Measures in the event of accidental release

#### 7.1. Protective measures for safe handling

Notes on safe handling: Comply with the minimum standards of TRGS 500 (Technical Rules for Hazardous Substances). Avoid contact with eyes and skin.

Measures to protect against fire and explosions: The product is non-flammable as long as moisture is still contained. Containers at risk must be cooled with water.

#### 7.2. Conditions for safe storage taking into account environmental compatibility

Information on storage conditions: Store in a cool, frost-free place

Requirements for storage rooms and containers: Keep containers closed, protect from frost and heat, do not empty containers with pressure, do not use pressure vessels

Storage class: 12 – Non-flammable liquids

#### 7.3. Specific End Applications

ThermoActive is a ready-to-use roof coating.  
GIS code BSW20  
Technical information from the manufacturer must be observed.

### 8. Limitation and monitoring of exposure / Personal protective equipment

#### 8.1. Parameters to monitor

**Occupational exposure limits and/or biological limits**

**Occupational exposure limits (OEL) Germany**

Does not contain substances to be monitored

#### 8.2. Limiting and monitoring exposure

Technical measures and applications of appropriate working methods, as listed in Section 7, shall take precedence over the use of personal protective equipment. Recommended analytical methods for workplace measurements: see the Federal Institute for Occupational Safety and Health (BauA).

**Personal protective equipment:** No special protective equipment required

Eye/Face Protection: wear safety goggles if necessary

Skin protection: wear protective gloves if necessary

Respiratory protection: wear respiratory protection if necessary

### 9. Physical and chemical properties

#### 9.1. Information on the basic physical and chemical properties

Physical state: liquid

Color: Basic colour white, depending on colouring

Smell: arteigen

Odour threshold: n.b.

Vapor pressure: n.b.

pH value:  $8.00 \pm 0.4$  at 20°C DIN 19266

Melting point/freezing point: 0 °C

Start of boiling: 100 °C

Flash Point: n.z.

Evaporation speed: n.b.

Flammability: n.z.

Upper explosion limit: n.z.

Lower Explosion Limit: n.z.

**MATERIAL SAFETY DATA SHEET ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

|                                           |                                                  |
|-------------------------------------------|--------------------------------------------------|
| Oxidizing properties:                     | n.z.                                             |
| Density:                                  | 1.04 ± 0.04 kg/dm <sup>3</sup> DIN EN ISO 2811-1 |
| Vapor density (20 °C):                    | n.b.                                             |
| Self-ignition temperature:                | n.z.                                             |

| Solid content:                            | approx. 56 % DIN EN ISO 3251                     |
| Fineness:                                 | < 40 µm DIN EN ISO 1524                          |

n.z. = not applicable

n.b. = not determined

**9.2. Other information**

deleted

**10. Stability and reactivity**

|                                                 |                                                                                                                                                                  |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>10.1. Reactivity</b>                         | No decomposition when stored and used as intended                                                                                                                |
| <b>10.2. Chemical stability</b>                 | No decomposition when stored and used as intended                                                                                                                |
| <b>10.3. Possibility of dangerous reactions</b> | No decomposition when stored and used as intended                                                                                                                |
| <b>10.4. Conditions to avoid</b>                | see Chapter 7                                                                                                                                                    |
| <b>10.5. Incompatible materials</b>             | Avoid contact with strong acids, strong alkalis                                                                                                                  |
| <b>10.6. Dangerous decomposition products</b>   | No decomposition when stored and used as directed. Fire, including heating through welding and cutting work, produces smoke, carbon dioxide and carbon monoxide. |

**11. Toxicological information****11.1. Information on toxicological effects****a) Acute toxicity**

Ingredients that may contribute to acute oral toxicity:

not a relevant component

Ingredients that may contribute to acute dermal toxicity:

not a relevant component

Ingredients that may contribute to acute inhalation toxicity:

is not a relevant component.

**b) Corrosive effect on the skin**

not a relevant component

**c) Severe eye damage/irritation**

not a relevant component

**d) Sensitization of the respiratory tract/skin**

Components that can contribute to respiratory sensitization:

not a relevant component

Ingredients that can help sensitize the skin:

Relevant ingredients:

1,2-benzisothiazole-3(2H)-one (0.048%, classification of substance: category 1)

Substance-specific limit values (SCL): Category 1: 0.05 %

The mixture is not classified in skin sensitization

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

### **e) Germ cell mutagenicity**

not a relevant component

### **f) Carcinogenicity**

not a relevant component

### **(g) Reproductive toxicity**

Ingredients that may contribute to reproductive toxicity:

not a relevant component

Components that can contribute to the effect on lactation:

not a relevant component

### **(h) Specific target organ toxicity with repeated exposure**

Ingredients that may contribute to Specific Target Organ Toxicity at Single Exposure, Category 1 and/or 2:

not a relevant component

Ingredients that may contribute to the Specific Target Organ Toxicity at Single Exposure, Category 3, Anesthetic:

not a relevant component

Ingredients that may contribute to Specific Target Organ Toxicity at Single Exposure, Category 3, Respiratory Irritation:

not a relevant component

### **(i) Specific target organ toxicity for single exposure**

not a relevant component

### **(j) Risk of aspiration**

not a relevant component

### **k) Endocrine disruption affecting human health**

not a relevant component

## **12. Environmental Claims**

### **12.1. Toxicity**

Components that can contribute to acute water hazards:

not a relevant component

Components that can contribute to chronic water hazards:

Zinc oxide (0.1%, Category 1, M-factor: 1)

The general limit values (GCL) must be observed: Category 1: 25 % Category 2: 2.5 % Category 3: 0.25 % Category 4: 25 %

The mixture is not classified as hazardous to water: Chronic.

Components that can contribute to ozone layer damage:

not a relevant component

Components that can contribute to endocrine disruption with an impact on the environment:

not a relevant component

### **12.2. Persistence and degradability**

Components that may contribute to persistent, bioaccumulative and toxic (PBT) properties of the mixture:

not a relevant component

Constituents that may contribute to very persistent and very bioaccumulative (vPvB) properties of the mixture:

not a relevant component

Components that may contribute to persistent, mobile and toxic properties (PMT) of the mixture:

not a relevant component

Components that can contribute to very persistent and very mobile properties (vPvM) of the mixture:

not a relevant component

### **12.3. Bioaccumulation potential**

There is no information available about the product

### **12.4. Mobility in the ground**

There is no information available about the product

### **12.5. Result of the PTB and vPvB assessment**

There is no information available about the product

### **12.6. Endocrine-disrupting properties**

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

There is no information available about the product

### 12.7. Other harmful effects

There is no information available about the product

## 13. Note on disposal

### 13.1. Waste treatment process

Properly dispose of in compliance with local official regulations.

Proper disposal by incineration in an incineration plant, local and official regulations must be observed.

#### **Treatment of contaminated packaging**

Packaging must be disposed of emptied (drip-free, wipe-free and spatula-free). Packaging must be reused or recycled as a matter of priority, in compliance with the applicable local and official regulations.

#### **Waste code in accordance with the Waste Directory Ordinance (AVV)**

080120 Aqueous suspensions containing paints or varnishes

## 14. Transport details

### 14.1. UN number

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

### 14.2. Proper UN shipping designation

#### **ADR/RID**

**The product is not a dangerous goods used in national/international road, rail, sea and air transport.**

#### **IMDG code / ICAO-TI / IATA-DGR**

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

### 14.3. Transport hazard class

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

### 14.4. Packaging group

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

### 14.5. Environmental hazards

**The product is not a dangerous goods used in national/international road, rail, sea and air transport.**

### 14.6. Special precautions for the user

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

### 14.7. Bulk cargo transport in accordance with Annex II of the MARPOL Convention and in accordance with the IBC Code

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

## 15. Legislation

### 15.1. Safety, health and environmental protection rules / specific legislation for the substance or mixture

#### **EU regulations**

Regulation (EC) No 1005/2009 (substances that deplete the ozone layer):

Not applicable

Regulation (EC) No 850/2004 (Persistent organic pollutants):

Not applicable

Regulation No. 649/2012 (Export and import of hazardous chemicals):

Not applicable

Regulation (EC) No. 648/2004 (Detergents Regulation):

Not applicable

Authorisation in accordance with Title VII of Regulation (EC) No 1907/2006:

None

Restrictions under Title VIII of Regulation (EC) No 1907/2006:

None

#### **National regulations**

Water hazard class WGK 1 Self-classification according to VwVws (Administrative Regulation of Water-Polluting Substances)

Solvent Regulation: Wb < 7 g/l (max. value according to VOC Annex II A/d 130 g/l)

## MATERIAL SAFETY DATA SHEET **ThermoActive**

according to Regulation (EC) 1907/2006

created: 14.07.2020

revised: 19.06.2026

### 15.2. Chemical safety assessment

No chemical safety assessment was carried out by the manufacturer for this mixture.

### 16. Other information
