

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

1. Name of the substance or mixture and the company

1.1. Product identifier

Substance Name / Trade Name PU Safe® - Coating

1.2. Relevant identification Use of the substance or mixture and uses that are discouraged

Relevant Identified Use: Protective coating for sealing material

Recommended Restriction of use: PU Safe® - Coating is a sealing coating for use on PU foams as a protective coating in window and door installation.

Details of the supplier providing the safety data sheet

Manufacturer / Supplier

Company: SICC Coatings GmbH, Wackenbergstraße
78-82, D-13156 Berlin
Phone: +49(0) 30 / 500 196-0
Fax: +49(0) 30 / 500 196-20
Email address: info@sicc.de
Responsible/issuing person: Application Technology / Research and Development

1.3. Emergency number Outside Business Hours 112, (Mon.-Fri.
08:00 - 16:30)

2. Possible dangers

2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008. No hazardous substance or mixture. Supplementary labelling elements/information on certain mixtures, EUH208

Supplementary labelling elements/information on certain mixtures, EUH210

2.2. Marking elements

Marking elements in accordance with Regulation (EC) No. 1272/2008.

No hazardous substance or mixture.

Signal word: No signal word

Hazard warnings: No hazard warnings required

Safety note:

P101: If medical advice is required, have packaging or label ready

P102: Keep out of reach of children.

P103: Read the label before use.

Other marking elements:

EUH208: Contains 1,2-benzisothiazole-3(2H)-one. May cause allergic reactions.

EUH210: Safety Data Sheet available on request.

EUH211: Attention! Spraying can produce dangerous respirable droplets. Do not inhale aerosol or mist

2.3. Other hazards

Based on the available information, the product does not contain any PBT or vPvB substances in content percentages greater than 0.1%.

3. Composition / information on the ingredients

3.1. Substances not applicable

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

3.2. Mixtures

1,2-benzisothiazole-3(2H)-one (0.0048%)

CAS Number: 2634-33-5

Acute Tox. 4 (Acute Toxicity Oral, Category 4, H302)

Skin Irrit. 2 (Corrosive/irritating effect on the skin, category 2, H315)

Eye Dam. 1 (Severe Eye Damage/Irritation, Category 1, H318)

Skin Sens. 1 (Skin Sensitization, Category 1, H317)

Aquatic Acute 1 (Hazardous to Water: Acute, Category 1, H400)

Zinc oxide (0.1%)

CAS Number: 1314-13-2

Aquatic Acute 1 (Hazardous to Water: Acute, Category 1, H400)

Aquatic Chronic 1 (Hazardous to Water: Chronic, Category 1, H410)

4. First aid measures

4.1. Description of the first aid measure

General information

No special first aid measures required. Bring the affected person out of the danger area. First responder must protect himself.

After inhalation

in case of complaints - fresh air supply

After skin contact

Cleanse skin with soap and water

After eye contact

If necessary, remove contact lenses, keep eyelids open and rinse with plenty of water, seek medical advice

After swallowing

can cause nausea, vomiting and diarrhea, also gastrointestinal irritation; consult a doctor and name the substance exactly.

4.2. Main acute and delayed symptoms and effects

Symptoms:

no information available

Risks:

no information available

4.3. Indications of immediate medical assistance or special treatment

Treatment:

no information available

5. Firefighting measures

5.1. Extinguishing agent

Suitable:

Foam, carbon dioxide, dry chemicals, spray mist, water

Unsuitable for safety reasons:

Observe local conditions.

5.2. Special hazards posed by the mixture

Sealed containers can burst in extreme heat (pressure build-up), smoke, carbon dioxide

5.3. Instructions for firefighting

Cool surrounding fire-prone containers with water from a safe distance. Material is non-flammable as long as moisture is contained.

6. Measures in the event of accidental release

Personal precautions, protective equipment and procedures to be used in emergencies

Protective regulations / see chapters 2 to 5

6.1. Environmental protection measures

Observe local, official regulations; Do not allow it to get into the sewer system.

6.2. Methods and material for retention and purification

Confine leaked material with non-flammable absorbents (e.g. sand, sawdust or similar) and dispose of it according to local regulations. Clean with water and cleaning agents, preferably do not use solvents.

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

6.3. Reference to other sections For more information, see sections 7, 8 and 13 of the Safety Data Sheet

7. Measures in the event of accidental release

7.1. Protective measures for safe handling

Notes on safe handling: Comply with the minimum standards of TRGS 500 (Technical Rules for Hazardous Substances). Avoid contact with eyes and skin.

Measures to protect against fire and explosions: The product is non-flammable as long as moisture is still contained. Containers at risk must be cooled with water.

7.2. Conditions for safe storage taking into account environmental compatibility

Information on storage conditions: Store in a cool, frost-free place

Requirements for storage rooms and containers: Keep containers closed, protect from frost and heat, do not empty containers with pressure, do not use pressure vessels

Storage class: 12 – Non-flammable liquids

7.3. Specific End Applications

PU Safe® – Coating is a ready-to-use
Protective coating for sealing materials.
GIS code BSW20
Technical information from the manufacturer must be observed.

8. Limitation and monitoring of exposure / Personal protective equipment

8.1. Parameters to monitor

Occupational exposure limits and/or biological limits

Occupational exposure limits (OEL) Germany

Does not contain substances to be monitored

8.2. Limiting and monitoring exposure

Technical measures and applications of suitable work methods, as listed in Section 7, have priority over the use of personal protective equipment. Recommended analytical methods for workplace measurements: see the Federal Institute for Occupational Safety and Health (BauA).

Personal protective equipment: No special protective equipment required

Eye/Face Protection: wear safety goggles if necessary

Skin protection: wear protective gloves if necessary

Respiratory protection: wear respiratory protection if necessary

9. Physical and chemical properties

9.1. Information on the basic physical and chemical properties

Physical state: liquid

Color: Basic colour: white

Smell: arteigen

Odour threshold: n.b.

Vapor pressure: n.b.

pH value: 8.00 ± 0.4 at 20°C DIN 19266

Melting point/freezing point: 0 °C

Start of boiling: 100 °C

Flash Point: n.z.

Evaporation speed: n.b.

Flammability: n.z.

Upper explosion limit: n.z.

Lower Explosion Limit: n.z.

Oxidizing properties: n.z.

MATERIAL SAFETY DATA SHEET PU Safe® Coating

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

Density:	0.9 - 1.00 kg/dm ³ DIN EN ISO 2811-1
Vapor density (20 °C):	n.b.
Self-ignition temperature:	n.z.
Distribution coefficient n-octanol/water:	n.b.
Decomposition Temperature:	n.b.
Explosive properties:	n.z.
Viscosity:	130 ± 2 KU
Solid content:	59 % DIN EN ISO 3251
Fineness:	< 140 µm DIN EN ISO 1524

n.z. = not applicable

n.b. = not determined

9.2. Other information

deleted

10. Stability and reactivity

10.1. Reactivity	No decomposition when stored and used as intended
10.2. Chemical stability	No decomposition when stored and used as intended
10.3. Possibility of dangerous reactions	No decomposition when stored and used as intended
10.4. Conditions to avoid	see Chapter 7
10.5. Incompatible materials	Avoid contact with strong acids, strong alkalis
10.6. Dangerous decomposition products	No decomposition when stored and used as intended. Fire, including heating through welding and cutting work, produces smoke, carbon dioxide and carbon monoxide.

11. Toxicological information**11.1. Information on toxicological effects****a) Acute toxicity**

Ingredients that may contribute to acute oral toxicity:

not a relevant component

Calculated Estimated Acute Oral Toxicity ATE (mix): 861326 mg/kg

The mixture is therefore not classified as Acute Toxicity Oral.

Ingredients that may contribute to acute dermal toxicity:

not a relevant component

Calculated estimated acute dermal toxicity ATE (mix): 4608290 mg/kg

The mixture is therefore not classified as Acute Toxicity.

Ingredients that may contribute to acute inhalation toxicity:

not a relevant component

Calculated estimated acute inhalation toxicity ATE (mix): 11764 mg/l/4h

The mixture is therefore not classified as Acute Inhaled Toxicity.

b) Corrosive effect on the skin

not a relevant component

c) Severe eye damage/irritation

not a relevant component

d) Sensitization of the respiratory tract/skin

Components that can contribute to respiratory sensitization:

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

not a relevant component

Ingredients that can help sensitize the skin:

Relevant ingredients:

1,2-benzisothiazole-3(2H)-one (0.0048%, classification of substance: category 1)

Substance-specific limit values (SCL): Category 1: 0.036 %

The mixture is not classified in skin sensitization

e) Germ cell mutagenicity

not a relevant component

f) Carcinogenicity

not a relevant component

(g) Reproductive toxicity

Ingredients that may contribute to reproductive toxicity:

There are no relevant ingredients in the mixture.

The mixture is not classified as reproductive toxicity.

Components that can contribute to the effect on lactation:

There are no relevant ingredients in the mixture.

The mixture is not classified in the additional category for effects on lactation.

(h) Specific target organ toxicity with repeated exposure

Ingredients that may contribute to Specific Target Organ Toxicity at Single Exposure, Category 1 and/or 2:

not a relevant component

Ingredients that may contribute to the Specific Target Organ Toxicity at Single Exposure, Category 3, Anesthetic:

not a relevant component

Ingredients that may contribute to Specific Target Organ Toxicity at Single Exposure, Category 3, Respiratory Irritation:

not a relevant component

(i) Specific target organ toxicity for single exposure

There are no relevant ingredients in the mixture.

The mixture is not classified in Specific Target Organ Toxicity (repeated exposure).

(j) Risk of aspiration

There are no relevant ingredients in the mixture.

The mixture is not classified as a risk of aspiration.

k) Endocrine disruption affecting human health

There are no relevant components

12. Environmental Claims

12.1. Toxicity

Components that can contribute to acute water pollution:

Relevant ingredients:

Zinc oxide (0.1 %), category 1, M-factor: 1)

LC50 (fish): 0.78 mg/l, EC50 (crustaceans): 0.53 mg/l, ErC50 (algae): 136 mg/l

The limit must be respected: 25%

The mixture is not classified in this hazard category.

Components that can contribute to chronic water pollution.

The mixture is not classified in this hazard category.

Components that can contribute to the depletion of the ozone layer.

The mixture does not contain any relevant components.

The mixture is not classified as harmful to the ozone layer.

12.2. Persistence and degradability

There is no information available about the product

12.3. Bioaccumulation potential

There is no information available about the product

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

12.4. Mobility in the ground

There is no information available about the product

12.5. Result of the PTB and vPvB assessment

There is no information available about the product

12.6. Endocrine-disrupting properties

There is no information available about the product

12.7. Other harmful effects

There is no information available about the product

13. Note on disposal

13.1. Waste treatment process

Properly dispose of in compliance with local official regulations.

Proper disposal by incineration in an incineration plant, local and official regulations must be observed.

Treatment of contaminated packaging

Packaging must be disposed of completely empty (drip-free, smudge-free and spatula-free). Packaging must preferably be reused or recycled in compliance with the applicable local and official regulations.

Waste code in accordance with the Waste Directory Ordinance (AVV)

080120 Aqueous suspensions containing paints or varnishes

14. Transport details

14.1. UN number

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.2. Proper UN shipping designation

ADR/RID

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

IMDG code / ICAO-TI / IATA-DGR

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.3. Transport hazard class

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.4. Packaging group

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.5. Environmental hazards

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.6. Special precautions for the user

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

14.7. Bulk cargo transport in accordance with Annex II of the MARPOL Convention and in accordance with the IBC Code

The product is not a dangerous goods used in national/international road, rail, sea and air transport.

15. Legislation

15.1. Safety, health and environmental protection rules / specific legislation for the substance or mixture EU regulations

Regulation (EC) No 1005/2009 (substances that deplete the ozone layer):

Not applicable

Regulation (EC) No 850/2004 (Persistent organic pollutants):

Not applicable

Regulation No. 649/2012 (Export and import of hazardous chemicals):

Not applicable

Regulation (EC) No. 648/2004 (Detergents Regulation):

Not applicable

Authorisation in accordance with Title VII of Regulation (EC) No 1907/2006:

None

Restrictions under Title VIII of Regulation (EC) No 1907/2006:

MATERIAL SAFETY DATA SHEET **PU Safe® Coating**

according to Regulation (EC) 1907/2006

created: 19.01.2021

revised: 28.08.2026

None

National regulations

Water hazard class WGK 1 Self-classification according to VwVws (Administrative Regulation of Water-Polluting Substances)

Solvent Ordinance: Wb < 5 g/l (max. value according to VOC Annex II A/c 40 g/l)

15.2. Chemical safety assessment

No chemical safety assessment was carried out by the manufacturer for this mixture.

16. Other information

Changes from the last version

Replaces datasheet from: 28.08.2026
